IBM Aspera on Cloud

1. Overview

To set up and access Aspera on Cloud, you must first create an IBMid, verify it via email, and log in. After logging in, you can configure the Multi-Factor Authentication (MFA) verification methods that suit your preferences. **While MFA is mandatory**, you have the flexibility to choose the verification methods that best meet your requirements.

Next, enable the browser extension, install the Connect plugin, and use the Aspera on Cloud interface to download files.

This document provides detailed, step-by-step instructions to guide you through these processes and help you get started with the tool.

2. Setting up an account

Upon receiving an email invitation from donot-reply@ibmaspera.com, sent on behalf of a Finastra representative, click on **Accept Invitation** to proceed.

[EXT] [IBMASperaOnCloud] Welcome to IBM Aspera on Cloud

To: ☐ Helpdesk, : ...

IBM Aspera on Cloud

Hi alm.helpdesk@finastra.com,

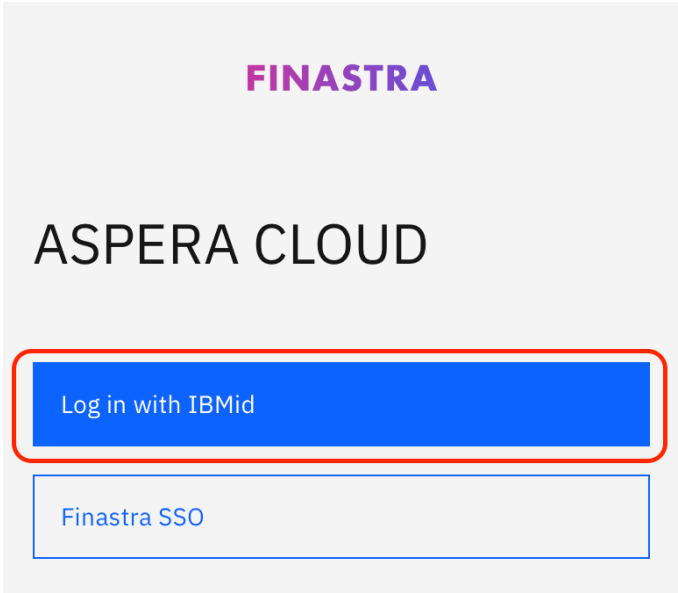

You have been invited by donot-reply@finastra.com to use IBM Aspera on Cloud's

Please verify the sender of this invitation before proceeding. If you believe you received this message in error, please do not accept the invitation.

Accept Invitation

© Copyright IBM Corp. All rights reserved

On the Aspera cloud page, click **Sign in with IBMid**.

Please enter the required details to create your IBMid, then click "**Next**." Ensure that you use the email address to which the invitation was sent, as using a different email will prevent you from logging in.

About your IBMid Account

By creating, or using, an IBMid to access an IBM Web site or other service, you acknowledge that you have read, understand, and agree to be bound by the below terms, in addition to the terms in the IBM Terms of Use, the IBM Privacy Agreement and the "About your IBMid Account Privacy" section of this notice provide details on how IBM protects your personal data.
Most IBMid accounts are individual IDs, meaning you manage your own account information and access your account through the IBMid login service (i.e. IBMid is the authenticating agency).
If your account is created using an email address containing a domain owned by an organization which you are employed by, contracted to, or volunteer for, your organization can:

- inquire about the status of your ID
- request your account settings (including your personal information)
- at its option, convert it to an enterprise ID.

If your account was created as (or is converted to) an enterprise ID, your organization manages your account information. It is also the authenticating agency for your ID, meaning your access is controlled by your organization's login service.

About your IBMid Account Privacy

What data does IBM collect?

Why IBM needs your data

How your data is obtained

How IBM uses your data

How IBM protects your data

How long we keep your data

Your rights

I acknowledge that I understand how IBM is using my Basic Personal Data and (if applicable) how my organization may become the authenticating agency for my IBMid account. I certify that my age is at least the age of consent for my country of residence.

Page 6 of 17

If you are taken back to the home page, click **log in with IBMid** and sign in.

Once you try logout and login second time it will prompt for configuring Verification methods

IBM

Multifactor authentication enrollment

Choose a verification method for multifactor authentication.

IBM Security Verify app Verify with a simple tap on your iOS or Android device with the IBM Security Verify app. RECOMMENDED →	Authenticator app A time-based one-time passcode (TOTP) that is generated by an authenticator app on your mobile device. RECOMMENDED →
Device with biometrics sensor Device with fingerprint or facial recognition. RECOMMENDED →	Email A one-time access code sent to your email address. →
Hardware security key Hardware security key such as the Yubikey 5 series. RECOMMENDED →	

If you have configured the same you can validate the same from below steps.

3. Configure verification methods [MFA]

Note: Multi-Factor Authentication (MFA) is **mandatory** for logging in to Aspera, with email OTP set as the default method. However, you have the flexibility to configure alternative verification methods that best suit your preferences.

To **Configure**, please click on the below link to configure verification methods:

<https://www.ibm.com/ibmweb/myibm/us-en/profile>

Then, login with your IBMid mail id and click **continue**.

IBM

Log in to IBM

Log in →

[Forgot password?](#)

Next, you will receive an email with a verification code included, like the below.

Once received, enter your code here in the box provided.

Enter the code sent to your email

For added security, we sent a 6-digit code to
g*****@.com.

Please enter the code below within 20 minutes

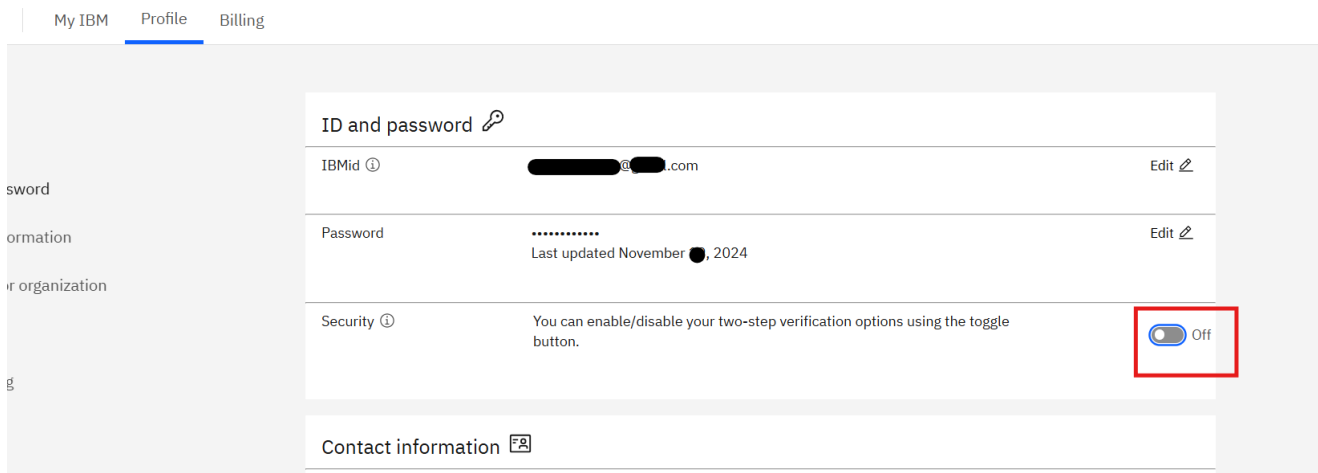

Enter email code

V1885-

.....

Verify

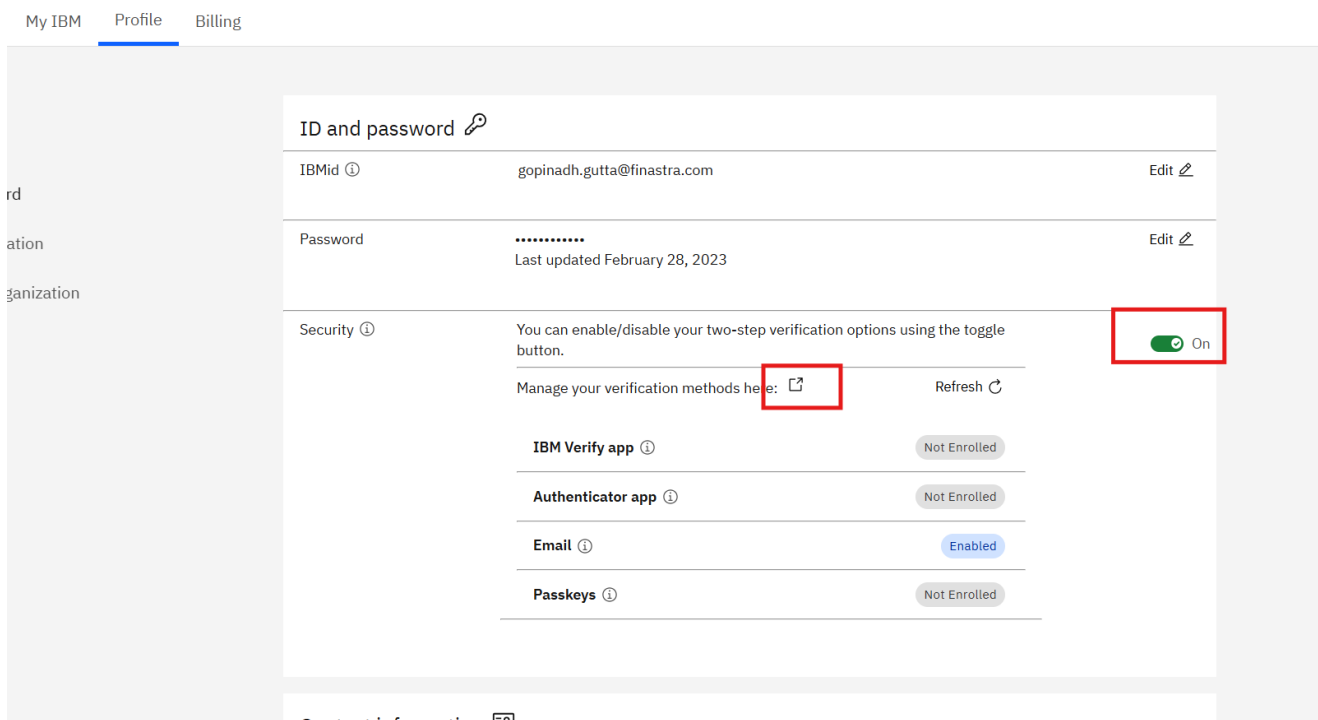

Once entered, this page will open. Please ensure that the security toggle is turned on.

After enabling the security function, you will see four options displayed as shown below.

Click on **Manage Your Verification Methods Here** to configure your preferences.

Please note that even if this option is **disabled**, Aspera on Cloud will still prompt for Multi-Factor Authentication (MFA) based on its risk analysis. However, Finastra recommends enabling this option to ensure that MFA is required for every login, regardless of the risk analysis, providing a faster and more secure login experience.

You will receive one more email notification with a code. Once received, please enter it into the box, as shown below.

Enter the code sent to your email

For added security, we sent a 6-digit code to
gop***@finastra.com.**

Please enter the code below within 20 minutes

Enter email code

V1999-

Verify

As shown below, email is now set up as the verification method. You can also click **Add new method** to choose other verification methods that work best for you.

4. How to login

Once you're set up, to login, click this URL: <https://finastra.ibmaspera.com>

The screen shown below is the home page of Aspera Cloud. To download files, click on the box in the righthand corner (red highlighted below), then select **Manage and Share Files**.

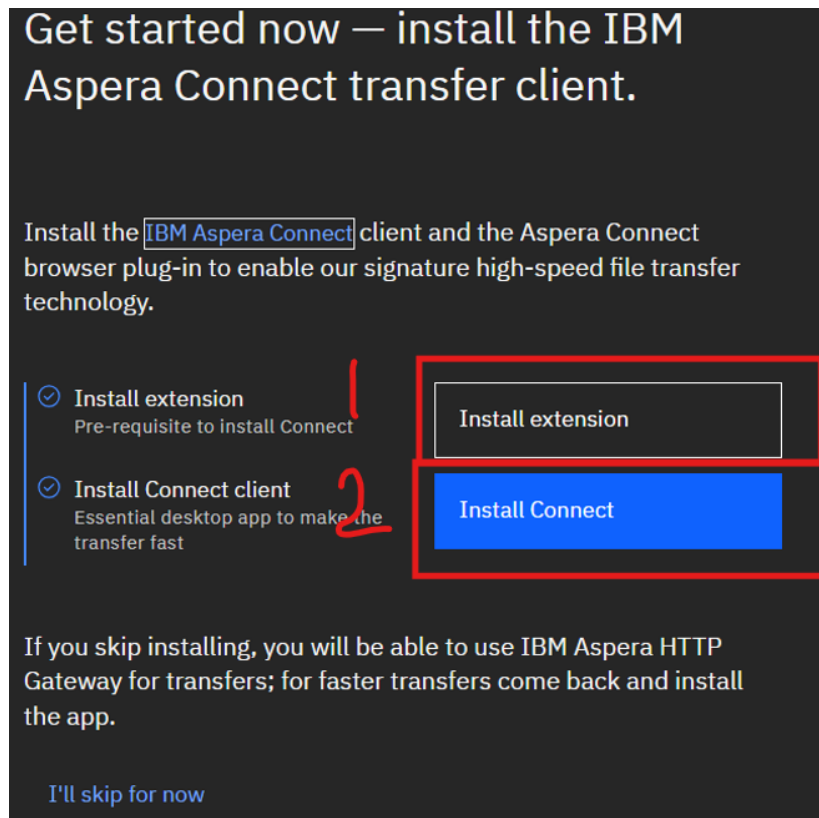

5. Enable extension and install Connect plugin

You will receive a pop-up with the screen shown below, to install the extension and Connect plugin.

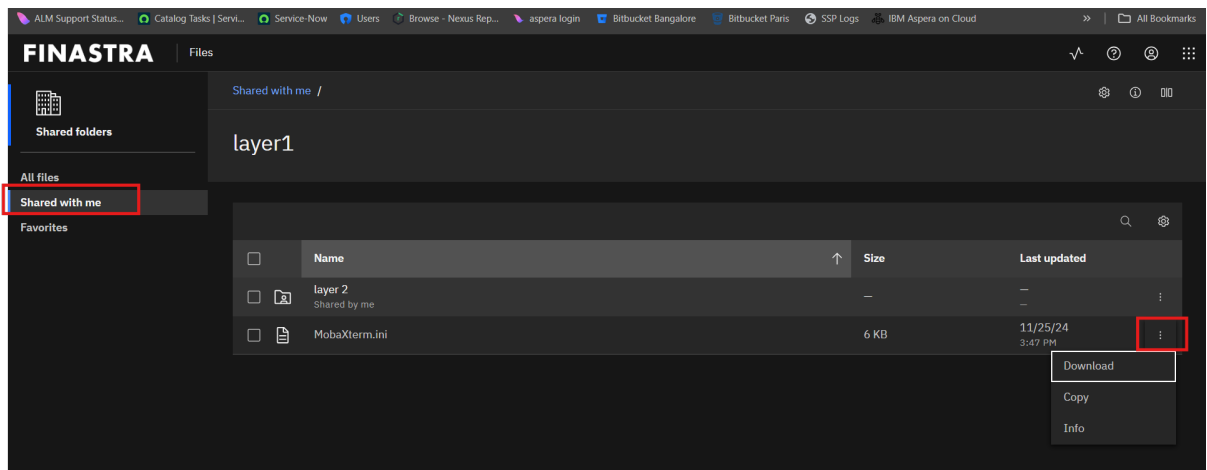

Please enable the browser extension and download Connect. Next, follow the steps to install Connect on your PC.

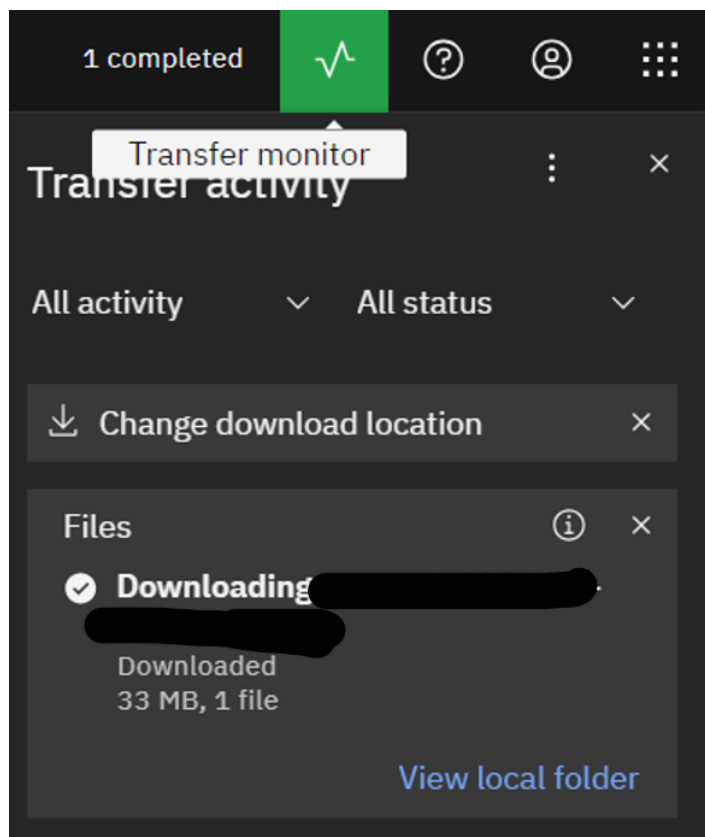

6. File downloads

The shared workspace is located at the top left corner, shown below as **Shared with me**.

For downloading files, click on the three dots, and you will find the **Download** button.

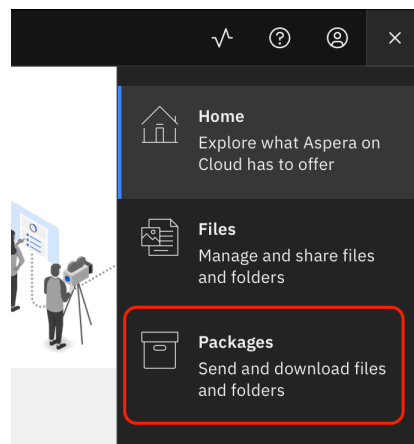

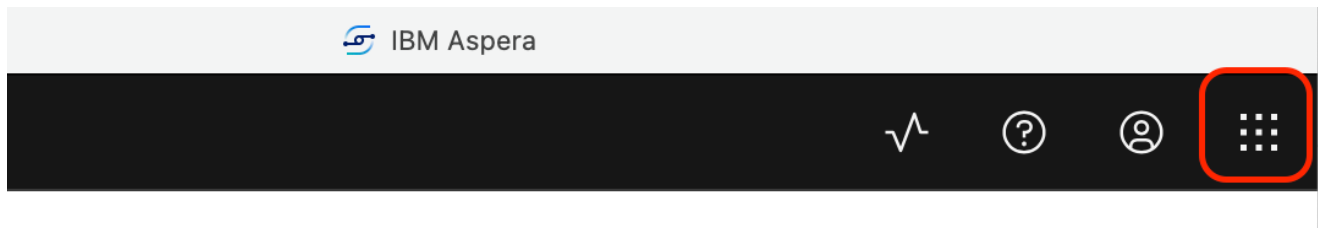

You can confirm if the files have been downloaded by clicking **Transfer Monitor**, which is located at the top right of the page.

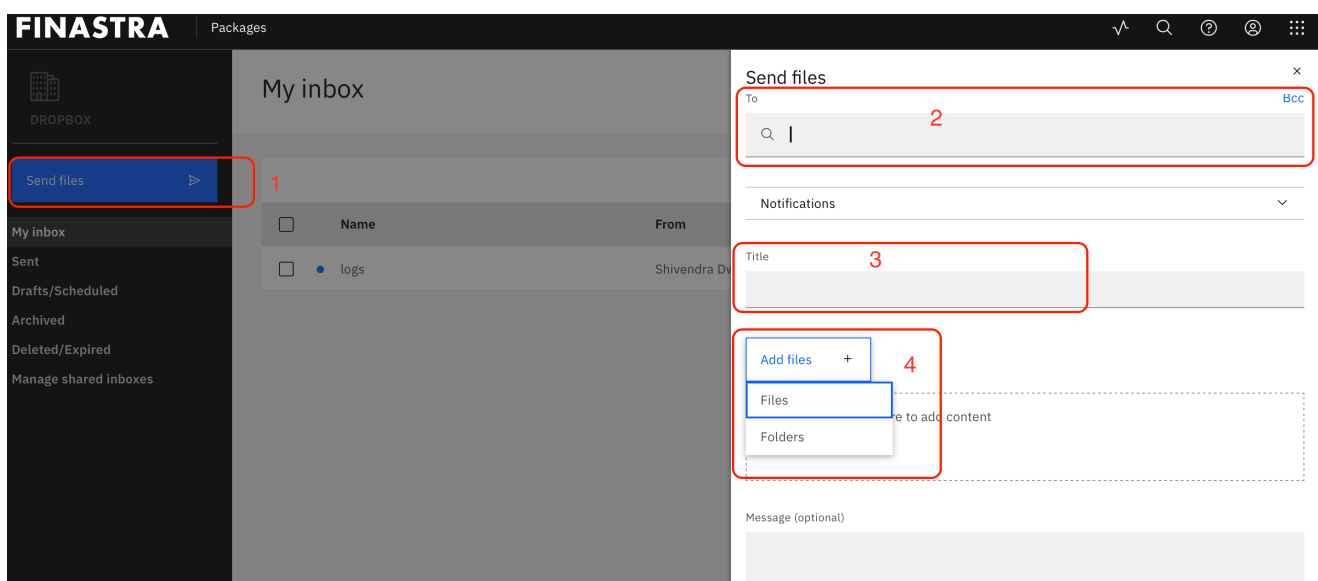

7. Send packages

Click on App switcher and Packages

Instructions for Sending Files

1. Click on **Send Files**.
2. Select the desired user(s) from the **To** list.
3. Update the **Title** field with the file name.
4. Click on **Add Files or Folders**.
A pop-up will appear, allowing you to browse and upload files or folders from your computer.
5. Set the **Password**
6. Click on **Send Files**.

Password protection

Setting a password for your package will require recipients to enter it to decrypt its contents. This password is not sent through IBM Aspera.
